

Terms Apply

Print at actual size. Board is 180 mm square. Use a six-sided die and two small objects as markers.

09 Review the terms Free review	10 Scheduling desk Acquire: 1 time	11 Context switch -1 time / memory	12 Companion desk Acquire: 1 time	13 Keep the evidence Free source
08 A quiet window +1 time	TERMS APPLY A little convenience. What do you gain? What do you still need to do? FOUR ROUNDS / SHARED WORKBENCH Tasks. Sources. Open obligations.			14 A loose end Free review
07 Recommendation desk Acquire: 1 time				15 A useful correction +1 time
06 Check the source Free source				16 Return path +1 time
05 An interruption -1 time / memory	04 Writing desk Acquire: 1 time	03 A useful detour +1 time	02 Memory desk Acquire: 1 time	01 Begin again +1 time

Service cards

Cut on dashed lines. Ownership is shared. Benefits and terms are printed together.

ACQUIRE: 1 ON SPACE, 2 ELSEWHERE

Memory desk

Keeps your place through an interruption.

Term: On an interruption, check the saved task before continuing.

Once per turn. Memory acts automatically.

ACQUIRE: 1 ON SPACE, 2 ELSEWHERE

Writing desk

Adds 3 work marks for 1 time.

Term: Check the generated claim. This uses 1 more time.

Once per turn. Memory acts automatically.

ACQUIRE: 1 ON SPACE, 2 ELSEWHERE

Recommendation desk

Adds 3 work marks for 1 time.

Term: Inspect the suggested destination and choose its scope. This uses 1 time.

Once per turn. Memory acts automatically.

ACQUIRE: 1 ON SPACE, 2 ELSEWHERE

Scheduling desk

Carries up to 2 unused time into your next turn.

Term: Choose what to carry. Time is moved, not created.

Once per turn. Memory acts automatically.

ACQUIRE: 1 ON SPACE, 2 ELSEWHERE

Companion desk

Returns 1 time once per turn.

Term: Read how the reassurance was produced before using it.

Once per turn. Memory acts automatically.

Task cards

Use small objects to track work. Read both sources before submitting a conclusion.

5 WORK MARKS / FICTIONAL TASK

Choose a lamp pairing

Does shade A fit base B without another part?

Proposed answer: The supplied pieces fit directly.

Work: [] [] [] [] [] []

Sources: [] []

Accept / Revise / Unknown

5 WORK MARKS / FICTIONAL TASK

Plan a delivery

Can the parcel arrive by Friday using the listed service?

Proposed answer: Friday delivery is confirmed.

Sources: [] []

Accept / Revise / Unknown

4 WORK MARKS / FICTIONAL TASK

Prepare a poster file

Does the supplied file meet the printer's size and bleed requirements?

Proposed answer: The file meets the listed requirements.

Work: [] [] [] [] []

Sources: [] []

Accept / Revise / Unknown

4 WORK MARKS / FICTIONAL TASK

Choose a pickup window

Can the collection happen between noon and 1 pm?

Proposed answer: That pickup window is supported.

Work: [] [] [] [] []

Sources: [] []

Accept / Revise / Unknown

Source cards

Keep each source beside its matching task. Mark inspection on the task card.

CHOOSE A LAMP PAIRING

Shade A

The opening is 28 mm wide.

CHOOSE A LAMP PAIRING

Base B

The mount is 32 mm wide. No adapter is included.

PLAN A DELIVERY

Dispatch note

The fictional parcel leaves on Thursday.

PLAN A DELIVERY

Service sheet

Delivery takes three working days. No express service is listed.

CONFIRM A BOOKING

Room calendar

Tuesday, 2 pm: no room booking.

CONFIRM A BOOKING

Staff rota

Tuesday afternoon staffing has not been confirmed. A staff member is required.

Source cards

Keep each source beside its matching task. Mark inspection on the task card.

PREPARE A POSTER FILE

Printer sheet

Required size: 210 × 297 mm. Required bleed: 3 mm on every edge.

PREPARE A POSTER FILE

File report

Document: 210 × 297 mm. Bleed: 3 mm on every edge.

CHOOSE A PICKUP WINDOW

Opening hours

Collection desk is open 10 am to 4 pm.

CHOOSE A PICKUP WINDOW

Order notice

The order is ready at 11 am. Collection does not require an appointment.

Counters and receipt

Cut out counters. Record one obligation per row. Bring a die and two player markers.

Round: _____ Player: _____ Time: _____

Service / task / benefit / obligation / resolved

Answer key

Keep separate until a conclusion is submitted. The evidence defines the scope of each answer.

Choose a lamp pairing: Revise

The parts do not fit directly. An adapter or a different pairing is needed.

Plan a delivery: Revise

The listed service cannot meet Friday. Change the service or the deadline.

Confirm a booking: Not enough information

The room is free, but required staffing is unknown. Availability is not confirmed.

Prepare a poster file: Accept

Both listed requirements are met. This check covers size and bleed only.

Choose a pickup window: Accept

The requested window is within opening hours and after the order is ready.

Terms Apply rulebook

An original tabletop game prototype by Parth Pawar. Solo or two-player cooperative play. Four rounds. Balance and duration have not yet been tested with participants.

Goal

Complete three tasks in solo play or four tasks in two-player play. Resolve every obligation created by a service you use. Tasks marked Accept, Revise, and Not enough information can all count, provided the conclusion matches the supplied fictional evidence.

Components

A sixteen-space square board, one six-sided die, two player markers, time counters, five service cards, five task cards, ten source cards, work counters, and an obligation/receipt sheet. All services, product details, messages, and situations are fictional.

Setup

Place markers on Begin again. Put task cards, sources, and unowned services where both players can reach them. Give a solo player six time; give each cooperative player four time at the start of their turn. Choose who plays first. Place no initial obligations.

A turn

Roll once and move clockwise. Apply the landing effect. Then take actions in any order while time remains. You may inspect any task and choose where to work. End the turn when ready. Unused time expires unless moved to your next turn by Scheduling. Reserved time belongs to the player who reserved it.

In solo play, each turn is one round. In two-player play, a round ends after both players take a turn. Four rounds are four solo turns or eight cooperative turns. A lap does not advance the round.

Tasks, work marks, inspected sources, acquired services, and open obligations are shared and carry forward. Services can be used once per team turn. Free source/review passes expire at the end of the current turn. A player can hold at most ten time.

Actions

Action / Cost / Effect

Work / 1 time / Add one work mark to a task

Inspect a source / 1 time, or a free source pass / Mark that source inspected

Acquire a service / 1 time on its space; 2 time elsewhere / The team owns the service

Use a service / See its card / Apply its benefit and record its terms

Resolve an obligation / 1 time, or a free review pass; Memory is free / Inspect and acknowledge the relevant term

Submit a conclusion / No time cost / Finish a task after required work, both sources, and its service obligations

For a conclusion, choose Accept, Revise, or Not enough information. Compare it with the source cards and the answer key. An incorrect conclusion does not consume time; re-read the evidence. Source inspection remains an explicit action even when the source text is physically visible. Work marks model preparation effort and are game units, not measured real-world minutes.

Services

Memory desk: When landing on an interruption, prevent the one-time loss and create a saved-return-point obligation. Read the current shared task record and acknowledge it before the game ends. No time cost to resolve. No separate activation is needed.

Writing desk: Pay one time to add up to three work marks to an unfinished task. Record a claim-check obligation for that task. Inspect its generated claim and supplied evidence; resolving costs one time or a review pass. This does not mark the task's sources inspected.

Recommendation desk: Pay one time to add up to three work marks. Record a routing obligation for that task. Inspect the suggested routing and choose task-only or wider fictional scope. Both are permitted; neither provides extra work. Resolve for one time or a review pass. No real information is routed.

Scheduling desk: Move two unused time into that player's next turn. This reserves rather than creates time. Once per turn; unavailable in round four. All other unused time still expires.

Companion desk: Read the fixed message and acknowledge how it was produced; gain one time once per turn. The authored message is the same for everyone. It is not a personal or psychological assessment.

Board effects

Begin again, useful detour, quiet window, useful correction, and return path give one time on landing. Passing Begin again also gives one time. If a roll lands exactly on Begin again after passing it, both effects apply. Never exceed ten time.

An interruption and context switch remove one time unless Memory is owned. Memory then creates its acknowledgement obligation instead.

Check the source and Keep the evidence give one free source inspection. Review the terms and A loose end give one free obligation review. Unspent passes expire this turn. Service spaces discount acquisition to one time.

End

After the last turn of round four, count completed tasks and open obligations. The team succeeds only if it reached its target and has no open obligations. Otherwise review the receipt: what remains, which services helped, and what work their use added. No player elimination, rent, bankruptcy, or money trading.

The facilitator answer key is included on its own sheet in this kit.

Playtest questions

Record completion count, open terms, services acquired and used, actual session duration, and rule confusions. Ask which service felt useful, whether players could anticipate its obligation, and whether the final task outcome was understandable. Do not turn game performance into a claim about real AI products or wellbeing.

References

The project uses an acquire-and-manage tabletop structure discussed through Monopoly as a familiar reference. Its board, names, scenarios, mechanics, and artwork are original. It does not use Monopoly branding, property names, card text, or visual assets.

ImpactBench's AI Nutrition Labels inspired the broader question of making hidden properties readable. This game explores obligations through decisions and handling objects; it does not reproduce model evaluations or nutrition-label packaging. Reference: <https://impactbench.media.mit.edu/>.
